PYRAMID POWER: A SUB-ATOMIC ENERGY TO EXPAND CONSCIOUSNESS

By Dean Hardy

Man for many years has looked with wonderment at the Great Pyramid in Giza, Egypt. He has no understanding as to why and how it was built. What he has not understood is that the Cheops Pyramid was built to help mankind expand his consciousness. I believe the Cheops was originally built as a temple of initiation into the higher levels of consciousness. What I have found is that the pyramid is an antenna that refocuses light into sub-atomic particles; sometimes referred to as cosmic light, organic energy, etheric light, or by some pyramid researchers as biocosmic or life energies. At the point of achieving oneness, or attuning ourselves to this energy, matter as we know it passes away, and we can enter the sub-atomic or etheric world. Time and space no longer exist in this state of consciousness. Past, Present, and Future are all one. The human has entered the world of the Absolute. This is not a simple process; it may take a life time of prayer and meditation to achieve this oneness with this energy, which is synonymous to being at oneness with the Heavenly Father.

History tells us that many great people have been connected with the pyramids of Giza, Egypt. The Great Pyramid is a source of knowledge into the mysteries of life, and once served as a temple of knowledge for the Hermetic Mystery School. Some of those attaining this high masters goal were Moses, Solon, Thales, Pythagoras, and Plato.

The builders of the Great Pyramid fully understood more about the science of mathematics and the exact dimensions of the Earth than modern science did up until the International Geophysical Year 1957-1958. Curiously, buried within the measurements of this gargantuan edifice is found a key to the structure of the entire solar system. Mysteriously, buried within the sub-atomic energy of the Cheops is the key to mankind's freedom from matter.

Christ was visited by the Magi, three individuals schooled in the mysteries of life. They gave him gold and sent him for safety into Egypt. There he too achieved the knowledge of the mysteries of life and learned to use this sub-atomic energy. Because of the Love Christ had for mankind, he demonstrated this knowledge, thus giving everyman the freedom to find the kingdom of God within Himself. Christ said of his miracles, "Verily, verily, I say unto you, He that believeth on me, the works that I do shall He do also; and greater works than these shall He do." (St. John 14-12). The secret of this Knowledge is that the mind has to be trained to use this sub-atomic light for the benefit of mankind. The Great Pyramid has always been a tool to help man train his mind into this knowledge. This has been one of the best kept secrets of all the ages.

The velocity of light can be synonymous with consciousness. People can train themselves to see the vortex of light within the pyramid. It is the same energy as the human aura. If you place yourself in the center of this vortex you can speed up velocity of light within your own aura. In this way you can expand your own consciousness.

Last year I built a large pyramid in Allegan, Mich. I believe this structure is built differently from any other built at this time. In the construction of the pyramid I combined the dimensions of Cheops with a special lamination process

for the skin. What I have created is a large antenna, or lens, that will refocus light into sub-atomic light. Its presence can be detected by blue haze. This energy can be felt by some people upon entering the pyramid. It takes a few minutes for some to readjust to this energy. A simple explanation for this might be that the nervous system functions on electrical impulses and when you increase the speed of an impulse you get a sensation. By looking directly at the sun you hurt your eyes because you increased the electrical impulse and you over load your nervous system.

Several friends of mine have visited the pyramid. Some have the shocking experience of a complete distortion of time while they are in the pyramid--one hour becomes 20 minutes. Others have stated that they have been contacted by entities from other dimensions. Also, important messages have been received. Clairvoyance in general has been accelerated. Of course, these experiences have been related to me by friends and are not done under scientific observation.

Another sensation that can be experienced is the actual hearing of the music of the spheres. During the building of the pyramid I spent many hours inside. Gradually, I learned to hear a low hum. I believe this to be the hum of the electrons rubbing against each other. The more time a person spends in the pyramid the louder one can hear this. This indicates that a person slowly becomes adjusted to this energy. The more time a person spends in the pyramid the more attuned he becomes to the pyramid. I believe a person has to develop this attunement to receive anything at all from this energy source.

My interest in pyramids has spanned a number of years; however, I built this particular style of pyramid to help my son, John, who is a dyslexic. Five years ago I had a dream indicating that it was very necessary in John's development to be placed in a pyramid. After talking with many individuals concerning the various construction techniques, Kenneth Killick of Ottawa, Canada, was finally contacted. On July 18, 1975, he drew up a set of plans, and construction of the pyramid was begun.

In conclusion, the three points I wish to reveal about the pyramid are: (1) the pyramid is an antenna, (2) the Cheops was originally built to expand the consciousness, and (3) a process has been revealed to us by Kenneth Killick as to how to make the pyramid antenna more powerful. The pyramids in Giza, Egypt, were built for a different time continuum. Because the light frequencies at that time were much longer the pyramids had to be built in greater mass. At this point in time the light frequencies are much shorter, and with the proper knowledge you could build a 4 to 8 foot base pyramid model for your own home. This could be placed over your bed or in a special room to meditate in. You must remember a pyramid is an antenna system to expand your own energy field. Science calls this energy field the human aura. Many scientists now have to believe this aura exists because with Kirlian Photography, a process which captures on film radiations not visible to the naked eye, one can take a picture of the human aura. With the aid of Kirlian Photography people have been able to photograph this energy emanating from the tip of the Cheops. Kirlian Photography proves that this energy field does exist. Now, Man has to learn how to use it.
